FOR IMMEDIATE RELEASE

Hyena Highlights Multiple Product Upgrades and Innovations for 2025

Unveiling Next-Gen E-Bike Solutions at Taipei Cycle Show.

Taipei, Taiwan. – Mar 2025 – As Taiwan’s leading E-Bike Drive System provider, Hyena is set to showcase a series of system upgrades and all-new products at the 2025 Taipei Cycle Show. With a deep understanding of market trends and technical expertise, Hyena continues to expand its offerings, providing bicycle brands with cutting-edge solutions and comprehensive support.

A Brand New Thru-Axle Solution

Tailored for e-road bikes, the MRC-F250 redefines thru-axle performance with a standout design. At just 2.0 kg—lighter than most rivals—it combines a whisper-quiet ride with a class-leading 35 Nm of on-hub torque, supporting a 12-speed cassette. Test riders at the Taipei Cycle Show can feel its smooth precision firsthand.

Standard Drives: Lighter, Smaller, More Efficient

The H250 series marks a leap forward in Hyena's second-generation standard motor lineup. Shedding 400g, shrinking 5% in size, and boosting peak output to 425W, it offers unmatched power for steep climbs and swift sprints. Cyclists tackling Taiwan's hilly terrains have already praised its efficiency, with new e-bike models featuring the H250 set to hit shelves by mid-2025.

Enhanced Motor Series: Built for North America

Designed for US Level 3 e-bikes and EU speed pedelecs, Hyena's second-generation Enhanced D500 series delivers 500W and 50 Nm of on-hub torque, reaching speeds up to 28 mph. Paired with a 48V 480Wh battery and smart controller, it transforms commuting and adventure across diverse terrains—meeting North America's demand for top-tier e-bike performance.

Dealer Portal: Empowering Service Efficiency

Beyond hardware advancements, Hyena will also introduce its new Dealer Portal, a comprehensive service platform that integrates maintenance diagnostics, technical resources, and parts management into a single solution. This platform is designed to streamline dealers' workflows and improve service efficiency. For more details about its features, [[click here](#)].

Join Hyena at the 2025 Taipei Cycle Show

Experience these breakthroughs live at the Taipei Cycle Show, where Hyena invites you to test ride and explore real-world applications.

Event Details

 Date: March 26–29, 2025
